

## 12 > Best meditation apps

### 1. Download & Registration:

- Install “Meditopia” via your device’s app store.
- Open the app and register using your preferred sign-in method (email or social media).

### 2. Personal Guide Selection:

- During setup, choose a guide character from the available options. Each guide has a distinct voice and style.
- Answer a brief questionnaire to align the recommended sessions with your current emotional and mental needs.

### 3. Navigating Guided Meditations:

- Tap on the “Meditate” tab to see a collection of sessions sorted by duration and purpose (stress relief, sleep, focus, etc.).
- Select a session, read its description, and press “Start.”

### 4. Engagement & Feedback:

- As you progress through the meditation, follow the prompts that include mindful breathing exercises and visualization techniques.
- After completing the session, provide feedback to help refine future recommendations.

For a stressful mid-day break, choose a 10-minute session led by your favorite guide. Follow the detailed instructions to focus your breathing and clear your mind, and later, revisit your session history to see which sessions best alleviate your stress.

## 10. MyLife Meditation

MyLife Meditation offers a personalized approach by helping you check in with your emotions before recommending guided meditations tailored to your mood. It balances self-awareness with practical mindfulness exercises.

### 1. Download & Account Setup:

- Download “MyLife Meditation” from your device’s app store.
- Launch the app and sign up using your email or social login.

### 2. Mood Check-In:

- On opening the app, you’ll be prompted to “Check In” with your current feelings.
- Select from an array of emotions (e.g., anxious, calm, overwhelmed). This helps the app suggest an appropriate meditation session.

### 3. Session Recommendations:

- Based on your check-in, review the recommended sessions.
- Read through session descriptions to choose one that resonates with your present state.

### 4. Guided Meditation:

- Tap “Start” on your chosen session.
- Follow guided prompts that offer clear instructions on posture, breathing, and visualization.

- Use the “journal” feature post-session to note changes in mood and track progress.

If you’re feeling overwhelmed, check in as “stressed,” then select a 12-minute session geared toward deep breathing and grounding exercises. Follow along with the guided narration to center your thoughts and regain focus.

## 11. Oak – Meditation & Breathing

Oak is a minimalist app emphasizing simplicity. It features guided meditations, breathing exercises, and even a meditation timer, making it ideal for those who appreciate a clean interface without distractions.

### 1. Download & Installation:

- Search “Oak – Meditation & Breathing” in your app store and install it.
- Open the app and quickly navigate through the simple registration process.

### 2. Choosing a Practice:

- Oak prominently displays options for “Meditate,” “Breathe,” and “Sleep.”
- Tap “Meditate” to access various guided sessions.

### 3. Customizing Your Session:

- Use the built-in timer to set the duration of your meditation.
- Follow the minimalistic on-screen instructions. Oak provides a calm voice for guidance, coupled with subtle visual cues.

### 4. Tracking & Reflection:

- At the end of your session, mark it complete.
- Optionally, record a brief note on how the session affected your mood.

For a quiet morning session, select a 15-minute guided meditation through Oak. As you follow the instructions, allow the minimal interface and simple cues to guide your attention solely to your breath.

## 12. Buddhify

Buddhify is designed for on-the-go meditation, providing sessions crafted for various activities (e.g., walking, commuting, and working). Its design supports meditation in any situation.

### 1. Download & Setup:

- Download “Buddhify” from the app store.
- Open the app and quickly register using your email.

### 2. Activity-Based Sessions:

- On the home screen, browse meditation sessions categorized by your current activity.
- Choose a session labeled “Walking” or “Travel” if you’re on the move, or “Office” if you need a midday reset.
