

Breathe2Relax at a Glance

CHOOSING therapy

Before an important meeting, select a 5-minute session labeled “Pre-Meeting Focus.” Follow the brisk yet calming guidance to clear any pre-meeting jitters, ensuring you approach the task with enhanced clarity and calm.

20. Breathe2Relax

Developed as a stress management tool, Breathe2Relax focuses on diaphragmatic breathing techniques. It is widely used by clinical professionals and first responders, offering a no-frills approach to reducing stress and anxiety.

1. Download & Launch:

- Search for “Breathe2Relax” in your app store and download the app.
- Open the app; its clean, straightforward interface minimizes distractions.

2. Tutorial & Onboarding:

- The app begins with a brief tutorial explaining diaphragmatic breathing and its benefits.
- Follow along with the tutorial to learn how to engage your diaphragm for deeper, more effective breaths.

3. Engaging in a Session:

- Tap “Start” to begin a guided breathing session. The app will display visual cues (such as an expanding and contracting circle) alongside audio guidance.
- Follow the prompts carefully – inhale slowly as the circle expands, hold briefly, then exhale fully as the circle contracts.

4. Practice and Log Results:

- Continue the session for the recommended duration (typically 5–10 minutes).
- Log your experience at the end of the session to track how your stress levels change over time.

After an intense workday, launch Breathe2Relax and complete a 7-minute session focused solely on deep, rhythmic breathing. As the visual cues lead you through each breath cycle, notice the calming effect on your mind and body, reinforcing the practice as a go-to method for instant relaxation.
