

AI as your creative catalyst

Turn AI into your personal library and creative studio

Reading more and creating more are probably the two most common “I’ll do it next year” resolutions. You buy the books, bookmark the essays, save the reels, maybe even open a blank Google Doc... and then life happens.

AI can’t magically give you free time, but it can filter and line-up the right things to read, helping you actually finish long articles and books with summaries and notes. It can also act as a writing partner for blogs, poems, stories, scripts, newsletters, and turn your ideas into images, posters, covers and moodboards.

In 2026, with ChatGPT Go, Gemini 3 Pro and Perplexity Pro free for most Indian users, plus image tools like DALL-E 3 and

Gemini’s Nano Banana / Nano Banana Pro, you essentially have a full creative studio in your pocket. ChatGPT is already widely used for brainstorming and content creation, from drafting emails to creative projects. Perplexity, meanwhile, is tuned for web-backed answers, summarisation and research, with citations built in.

1. Get personalised reading lists

Instead of “I should read more”, we want:

“Here’s a 2026 reading roadmap tuned to my taste and time.”

ChatGPT and Gemini are both pitched as general writing/
