

- Over time, you'll see patterns that help identify triggers and effective coping strategies.

4. Personalize Your Techniques

- Save favorite exercises or add your own coping methods for quick access during crises.

Pro Tip: Combine Calm Harm with professional support. Share your activity logs with a mental health professional to get tailored advice.

Pillow

For Apple device users, Pillow integrates seamlessly with Apple Health, capturing sleep data through your iPhone or Apple Watch. Its clean interface offers insights into how long and how well you've slept, plus smart alarms to optimize wake-up times.

1. Install & Sync

- Grant Pillow permissions to access the Health app for sleep data.
- On Apple Watch, Pillow can automatically track sleep without manual input.

2. Choose Manual or Automatic Mode

- Manual: Tap "Start" when going to bed and "Stop" when you wake.
- Automatic: Pillow detects sleep based on movement and heart rate (Watch required).

3. Smart Alarm Settings

- Set your desired wake-up time and allow a 15-30 minute window for Pillow to find the lightest sleep phase.
- Wake up to gentle soundscapes or vibrations.

4. Review Sleep Reports

- Charts break down duration, sleep stages (light, deep, REM), and potential interruptions.
- Check weekly or monthly graphs to see trends.

Pro Tip: Use the optional audio recording feature to identify snoring or sleep-talking patterns, though it can consume more battery and storage.

Insight Timer

Insight Timer is a massive repository of guided meditations, live events, and music for relaxation. It caters to everyone – from beginners looking for short, calming sessions to advanced practitioners seeking more rigorous mindfulness exercises.

1. Browse or Search

- Use categories like "Stress," "Sleep," or "Anxiety" to find relevant sessions.

- Check session length (ranging from a few minutes to an hour or more).

2. Create a Profile

- Track the total minutes you've meditated, daily streaks, and progress over time.
- Personalize your feed by following your favorite teachers.

3. Set a Timer

- For self-guided meditation, use the custom timer with interval bells or background ambient sounds.
- Choose your own durations and soundscapes.

4. Join Community Groups

- Insight Timer hosts topic-based groups for shared experiences and discussions (e.g., "Mindful Parenting," "Dealing with Grief").

Pro Tip: Enable notifications for daily recommendations or live events featuring guest teachers and group meditation sessions.

Breathe+

Breathe+ focuses on guided breathing exercises to help reduce stress and anxiety. Its visual breathing cues make it simple to follow inhale-exhale rhythms, even if you're new to breathwork.

1. Select a Preset or Customize

- Choose from preset intervals (like 4-7-8 or Box Breathing) or set your own inhale, hold, and exhale durations.

2. Follow the Animation

- A moving graph expands or contracts, guiding each breath.
- The soothing visuals can help you maintain focus.

3. Adjust Settings

- Turn on vibrations if you want to practice with eyes closed, or add calming background music.
- Increase or decrease session length according to your preference.

4. Track Your Sessions

- Breathe+ logs total time spent in guided breathing and can display weekly or monthly stats.

Pro Tip: Try short sessions (1-2 minutes) during breaks if you work long hours at a desk. Regular micro-sessions can dramatically lower stress.

CardioBot

For Apple Watch owners, CardioBot interprets heart-rate data collected in the background, displaying trends and analytics in an easy-to-read dashboard. It tracks resting heart rate (RHR), heart rate variability (HRV), and more.
