

performance tuning. The decision to go for one or the other is influenced by a number of variables like the complexity of the problem, the need for performance, and the amount of expert knowledge available. AutoML can create very good baseline models quickly and thus support development in the early stages. If, however, one needs very fine architectural control or domain-specific optimisation, custom models are the way to go.

Here's an example of a custom neural network using PyTorch:

```
import torch.nn as nn
import torch
class CustomNet(nn.Module):
    def __init__(self):
        super().__init__()
        self.fc1 = nn.Linear(20, 64)
        self.fc2 = nn.Linear(64, 1)
    def forward(self, x):
        x = torch.relu(self.fc1(x))
        return self.fc2(x)
```

Future of open source AI on Windows

The main trends that are shaping the future of open source AI on Windows include:

- Deeper integration of DirectML that allows GPU acceleration across different vendors.
- More effective AutoML frameworks that cut down development time and costs.
- Smooth hybrid CPU–GPU workflows for performance.
- Stronger support from the open source community, which leads to the development and collaboration of new ideas.

With these advancements, AI on Windows has become an easily scalable, user-friendly, and future-proof platform for researchers, developers, and enterprises alike. **END** 🐧

Dhanashree Vipul Yevle is an assistant professor at Sardar Vallabhbhai Global University (SVGU), Ahmedabad, and a research scholar specialising in artificial intelligence, machine learning, and deep learning.

Dr Palvinder Singh Mann is a professor at Central University of Jammu (CUJ), Jammu, and has research interests in AI, soft computing, and cloud security.

DIY KIT: NFC, RFID, IoT & Embedded Systems

Want to learn and master NFC and RFID technology along with an IoT-enabled embedded system?

This kit includes all the essentials to start learning or building RFID/NFC projects.

POWERED BY

**IndusBoard
COIN**

Super small sized development board that enables you to create solutions for many use-cases where small size is super important.

SPECIAL INTRO PRICE

₹1,999 (Inclusive of GST)
