

FIXED DEPOSITS

Fixed Deposits is one of the most standard and commonly understood asset classes. When money is deposited for a fixed period with a bank or a company at a fixed interest rate, it is referred to as a fixed deposit.

The time and the rate of interest are fixed and hence, the name 'fixed deposits'. Fixed deposit is one of the simplest investment options where everything can be pre-determined. It is like giving away the money as a loan to a company i.e. in this case, lending to the bank.
