

HYBRID FUNDS

Dynamic Asset Allocation

The fund manager chooses between bonds and equities and can make re-adjustments based on market conditions. It can have any proportion of debt and equity based on the market.

- High flexibility in goals

Retirement Funds

Fund managers can invest anywhere they deem fit to meet the goals of retirement. These generally come with a lock-in period.

- About to retire.
- 50+ in age

Aggressive Allocation

This is a mutual fund that is more aggressive in risk-taking and seeks long term wealth generation. Here, a larger share goes towards equity.

- Long term goals
- Risk-taking ability: Moderate to high
- Time Horizon: 7+ years

Children Funds

These are managed specifically for long term goals of children – education and marriage. These have varying levels of debt and equity.

- Children related goals
- Risk-taking ability: Moderate to high
