

We will not go on a strict saving diet when it comes to day to day expenses. Many people fall into this trap to move more money towards long term investments. It is a very mis-advertised concept and after some time it becomes unsustainable. We work hard and we have to maintain a basic lifestyle. We want to buy a few expensive things and more than that enjoy our lives. We do not want to kill every small happiness in life due to a financial plan.

However, this does not imply that we become irrational about our expenses and start spending on things that ruin the entire Lazy Financial Plan. We need to strike a balance between the two so that our goals are met while keeping it sustainable.
