

GOALS TO BE MET IN MORE THAN 7 YEARS

Goals that are to be met in more than 7 years, are long term goals where we can invest up to 100% in equity. Here, we have enough time to deal with the volatility and as we want higher return so that the compounding effect is greater. The allocation within the different categories of equity will depend on our risk-taking willingness.

We know that we can invest in mutual funds either through SIP or in a lump-sum. A lump-sum amount can be invested via Systematic Transfer Plan (STP) or Portfolio Management Service (PMS). STP is better than PMS as it takes care of the valuation risk in a much more systematic manner.
