

INVESTMENT

It refers to the amount of investment we need to make today to meet future goals. In case of SIP, it is the amount we need to invest every month. In the case of lump-sum, it is the total amount we need to invest initially to reach our goal.

SIP OR LUMP SUM

Firstly, select the appropriate method of investing i.e. SIP or lump-sum.

EXPECTED RATE OF RETURN

Check the 7-year average returns of all the selected categories on the Morningstar Mutual Fund Screener. Based on asset allocation to different categories, we will calculate the weighted average return. This is our expected rate of return. We will understand this better using an example shortly.

TIME PERIOD

It refers to the number of years we have from today to meet the goal.

TOTAL VALUE

This is auto-calculated. It is approximately the total amount of money that we will have after the investment period. This is a rough estimate and amount will be somewhere around this.
