60	15,91,979	60%	9,55,187	9,55,187
TOTAL			1,10,92,620	3,27,83,871

Similarly, at age 55, he invested Rs 6.9 lac out of his salary. This amount grows to become Rs 12 Lac by the end of 5 years, i.e. at age 60. Use the same method. Rs 6.9 Lakh compounded for 5 years at 12%.

$$\Rightarrow 6,86,046 \times (1+12\%)^5 = 12,09,048$$
