

A man with brown hair and glasses, wearing a dark suit jacket, white shirt, and striped tie, is bent over, struggling to carry a large, heavy, burlap sack on his back. The sack is tied at the top and has the word "TAX" written on it in large, bold, black capital letters. The background is a solid light blue.

TAX

We will understand taxes as a constraint when creating our Lazy Financial Plan. We will focus on making investments or creating a financial plan while keeping in mind the tax implications of our decisions. Hence, an asset that might be much more attractive than other assets might become less attractive after considering tax implications.

We will be looking into the various types of taxes, the way they are calculated, the important terms related to taxes and lastly, the exemptions and deductions in India that we can benefit from. We will also take into account the differences between the new tax regime (introduced in Budget 2020) and the old tax regime. Putting all these together shall help us with everything relevant to our lazy profile and Lazy Financial Plan.
