

An analyst may be interested in market capitalization, fixed assets operating cash flow, earnings per share, multi-year return on investment (ROI), dividend yield, etc. all of which can be easily accessed through the screener.

A lot of pre-built screens are available which can be used as well. As we add more criteria, the screener will provide us with a smaller pool of companies to invest in. It saves a lot of time and may lead to exploration of new undiscovered companies.

Now, let us look at several companies with a high dividend yield. What conditions can be used? Remember, you can write your conditions as well.

This is how conditions look like

Dividend yield should be < 2% AND
Dividend payout should be < 100%AND
Profit growth for three years >10%OR
Profit growth for 5 years>10%OR

Profit growth for 7 years>10%AND
Average 5 years dividend >0 AND
Profit after tax>Net Profit last year
Dividend last year> Average 5 years
dividend AND

Highlights We must note that if a company has all **green flags** such as good returns and good growth then such companies should not trade at a **very low price**. Therefore, we must assess all these elements in our evaluation part.

On the other hand, 2-3 companies might be low-priced because they are yet to be discovered. Now, that is a great investment opportunity for us.
