Income Statement

The most significant expense here is the cost of goods sold, which is quite big in itself i.e. 4675.78 Cr.

Employee expenses are low. Therefore, it is not a service business.

They do have some loans, but it is not too high, which in itself is good. Hence, finance cost i.e. interest expenses are low.

Now, since we are aware of the profits earned, we can calculate EPS. The cash flows will help us calculate the money earned by the company through its operations and also how the company decides to spend it.

This is exactly what we will do in the first segment!

We have to read the consolidated financials to understand where the majority of the value is i.e. in both the balance sheet and the income statement.

Let's move on to the next section, where we'll discover and calculate various ratios.
