

Identifying opportunities is hard, but it's rewarding. It takes a lot of discipline to read, analyze companies and keep a track of company's growth and business activities.

### Do's

- Our focus should be mainly on determining or identifying the intrinsic value or real value.

### Dont's

- Avoid buying when there is too high positive sentimental value inbuilt into the price.
- Avoid selling when there is too high negative sentiments in price.

How to do these and identify opportunities is what we will learn in this book.
