In practice, we will never be creating Candlesticks. In fact, we will access data for candlesticks using the charts and use them to conduct analysis. This is typically how candlesticks look in a chart. An individual candlestick means nothing in itself, but it is the pattern that we study and derive conclusions. The art of reading candlesticks is in understanding the patterns hidden in them. For practice, we will stop here and estimate the High, Low, Open and Close price for each of the candlesticks shown in the chart.
