

Pattern 3

ENGULFING BULL & BEAR

The 'Engulfing Patterns' are two candlestick patterns. Here, the first candle is engulfed by the second candle. This means that the second candle's body completely shadows the first candle's body.

ENGULFING BULL

Bull Engulfing candlestick pattern is formed when the general trend is downward, and then a bull candle engulfs a bear candle completely. The bull candle's body will completely cover the bear candle's body.

ENGULFING BEAR

Bear Engulfing Candlestick pattern is formed when the general trend is upward. A bear candle completely engulfs a bull candle and we expect the bears to build on the control that they have gained.
