

Step 2:

Transition to creating custom screens by exploring various types of pre-built scans or screens, then proceed to build your own custom screen straightforwardly on the platform.

The screenshot shows the 'Create a Search Query' interface on the Screener platform. The top navigation bar includes 'FEED', 'SCREENS', and 'TOOLS'. A search bar at the top right contains the text 'Q Search for a company' and a user profile 'PRIYA SINGH'. The main area is titled 'Create a Search Query' and features a large text input field for the query. To the right of the input field is a 'Custom query example' box containing the following text: 'Market capitalization > 500 AND Price to earning < 15 AND Return on capital employed > 22%'. Below the input field, there is a checkbox labeled 'Only companies with Dec 2023 results' and a blue button labeled 'RUN THIS QUERY'. To the right of the button is a link labeled 'SHOW ALL RATIOS'. At the bottom right of the interface is a 'Go Back' link.

Creating a custom query on screener is quite simple. The first thing you'll need is a clear thesis or idea for what you're looking to achieve. Then, you'll need to determine how this thesis can be reflected in numerical data, allowing you to screen companies accordingly.

For instance, let's say your thesis revolves around the **return on equity (ROE) of a company**.

The screenshot shows the 'Ratio Gallery' interface. At the top, there is a row of operators: '+', '-', '/', '*', '>', '<', 'AND', and 'OR'. Below this is a row of tabs: 'Most Used', 'Annual P&L', 'Quarter P&L', 'Balance Sheet', 'Cash Flow', 'Ratios', and 'Price'. The 'Most Used' tab is selected. Below the tabs is a search bar labeled 'Search ratio' with the placeholder text 'eg. sales'. The interface is divided into three columns: 'RECENT', 'PRECEDING', and 'HISTORICAL'. The 'RECENT' column contains five items: 'Sales', 'OPM', 'Profit after tax', 'Market Capitalization', and 'Sales latest quarter'. The 'PRECEDING' column is empty. The 'HISTORICAL' column contains five items: 'Sales growth 3Years', 'Sales growth 5Years', 'Profit growth 3Years', 'Profit growth 5Years', and 'Average return on equity 5Years'.
