Now, if you want to adjust or add parameters based on specific investment objectives or preferences, follow these step-by-step instructions:

- **Modify Existing Criteria**
- **Add New Ones**

a. Modify Existing Criteria: To adjust existing criteria like market capitalization, price-to-earnings ratio, or return on capital employed, simply update the values to reflect your new preferences. **For example, if you want to change the P/E ratio threshold to less than 10 instead of less than 15, edit the query accordingly.**
