

Chapter 3 - Exploring Different Screens

One of the screens available is the **Piotroski Scan**, which assigns a score ranging from **0 to 9** to evaluate a firm's financial strength. This score provides insights into how robust a company's business is financially. Companies that perform well on this scan typically have a **Piotroski score greater than 7**. You can look deeper into understanding this score by referring to resources such as **Investopedia**, which offers detailed explanations of the methods and metrics used to calculate it.

Another screen is the **Magic Formula**, which identifies companies based on specific criteria. These criteria include a **return on invested capital (ROIC) of 25%**, an **earnings yield of 15%**, a positive book value (indicating profitability), and a **market capitalization of 15**. Companies meeting these parameters are considered to have potential based on this formula.
