

Moving forward, we plan to explore the financial performance of other companies on our list, evaluating various aspects such as **revenue trends, profitability metrics, and capital allocation strategies**. By scrutinising these key indicators, we aim to make informed investment decisions and identify companies with strong growth prospects and sound financial health.

Let's consider another screen which focuses on **debt reduction**, targeting companies that exhibit a pattern of decreasing debt levels while simultaneously expanding their assets.

To qualify for inclusion in this screen, a company's debt from three years ago must be less than its current debt, and its gross block should be at least one or two times its gross block from the previous year.

Query

Debt < Debt 3Years back AND
Gross block > 1.2 * Gross block preceding year

This indicates a positive trend of asset growth and debt reduction, which is a favourable characteristic for potential investment.
