

1.3 Market Cap/Sales: This metric compares a company's market capitalization to its total sales revenue. It helps investors gauge how the market values the company relative to its sales performance. A lower market cap/sales ratio may suggest that a company is undervalued compared to its revenue.

1.4 Sales and Margin: These metrics provide insight into a company's profitability and efficiency in generating profits from its operations. Gross profit margin (GPM) measures the percentage of revenue remaining after deducting the cost of goods sold. Operating profit margin (OPM) represents the percentage of revenue remaining after deducting operating expenses. Net profit margin (NPM) indicates the percentage of revenue remaining after deducting all expenses, including taxes and interest. Quarter sales refer to the company's sales performance in the most recent quarter.
