

A look at size

From dinosaurs the size of chickens to lumbering sauropods, the animals that have walked and swum on Earth have varied enormously in size and shape and length. Let's take a look at a few examples.

Predator X
■ Length 49 ft
(15 m)

Orca
■ Length 30 ft (9 m)

Shonisaurus
■ Length 66 ft (20 m)

Leedsichthys
■ Length 30 ft (9 m)

Sperm whale
■ Length 66 ft (20 m)

Brachiosaurus
■ Length 75 ft (23 m)

Mammoth
■ Shoulder height
16 ft (5 m)

Great white shark
■ Length 20–26 ft (6–8 m)

Tyrannosaurus
■ Length 39 ft (12 m)

Hatzegopteryx
■ Wingspan 36 ft
(11 m)
