

>> **shoulder circles/head looks**

- 1 Start with your feet hip-width apart and parallel. Bend your knees. As you straighten them, start circling your shoulders forward. As you bend your knees again, you should be finishing the shoulder circle. Circle 4 times forward, then 4 times back.

- 2 Straighten your knees and lengthen through the top of your head toward the ceiling. Look over your right shoulder. Bring your head back to center, then look over your left shoulder. Repeat, alternating sides for 4 reps (1 rep = both sides).
