

>> push-ups/hip stretch

207

27 Roll onto your knees and place your hands on the floor underneath your shoulders. Bring your knees back so that your shoulders, hips, and knees all form one straight line (inset). Inhale as you bend your elbows back to touch the sides of your rib cage. Exhale as you straighten your arms. Repeat 8 times, keeping your body in one straight line.

28 Bring the right leg forward between the hands, keeping the left knee behind you. Gently press the hips toward the right heel. If you can, take both hands off the floor and place them on top of the right knee. Keep the back long as you breathe into the hip stretch. Repeat on the other side.

knee in line with foot
