

25

Lie on your back, fingers laced behind your head. Bend both knees to your chest, then take your legs out to a 90° angle. Inhale and, as you exhale, pull your navel to your spine and slowly lift your head (inset). Inhale and relax your head down. Repeat 8 times. Next time, as you exhale, twist your upper torso, taking your left elbow toward your right knee while extending your left leg. Inhale, relax your head and leg down, then reverse. Repeat, alternating sides for a total of 4 reps.

26

Relax your head onto the floor and hug your knees into your chest, stretching out your lower back and hip socket. Then roll your bent knees over to the right as you extend your arms sideways and turn your head to look left. Relax into the stretch before returning to center to repeat on the other side.
