

>> balance point stretch

47

- 11 Remain sitting. Bend your knees, slide a hand underneath each thigh, and lift your feet off the floor, finding your point of balance. You will probably need to lean back a little. Use padding underneath your bottom if you need it. Roll your shoulder blades down the back and pull with your arms to hold yourself up. Inhale and bow your head, rounding your back.

feel it here

- 12 Squeeze your sit bones together and pull down on your arms. Sit tall and lift your groin muscles toward your head (see p.19). Repeat 5 more times, breathing in as you round, and exhaling as you sit tall.

pull and lift
