

>> round back squat

feel it here

position the feet in a "V"

19 Come into a squatting position on the balls of your feet. Let your knees open and allow your heels to touch slightly and come off the floor. Bring your hips down toward your heels, then lean more into your hands, place your palms on the floor, and inhale as you lift the hips upward as far as you can. Keep your head down, heels up, and your knees slightly bent.

20 Take a long, slow exhalation as you round your back, tuck your hips in, and lower them toward the heels again, still keeping your head down. Repeat 2 more times.

tuck the tail in

allow heels to lift
