

>> pull-the-thread lunge

21 Go onto your hands and knees, place one leg in front, and lean into it, palms either side of the front foot. Line up the bent-leg knee and toes straight ahead in front of the hip. Press the foot into the floor. Extend the other leg straight behind you and tuck the pelvis under strongly.

22 Pull an imaginary thread up to the ceiling with the hand on the side of the extended leg. Look up at the hand and press down into the floor with your other hand. Stay for 2 breath cycles. Take the hand down to the floor, then repeat with the other leg in front.
