

>> flat back squat

5

Lift the abs and roll down your spine into a squatting position. Let your knees open and go onto the balls of your feet. Lean on your hands, then inhale as you lift diagonally up and out with your chest, keeping your back flat and extended. Imagine you are looking under a table.

6

Exhale slowly as you lift the hips upward, taking the heels as high as you can. Straighten your knees and tuck your chin into the legs. Keep lifting the groin muscles toward the head. Stay and breathe, then repeat, intensifying the stretch at the end. Lower and relax. Repeat.
