

IN DETAIL

◁ STAND COLLAR

The short stand collar is a feature that became more popular on men's coats (and waistcoats) from the 1790s. The fully embroidered, stepped, cutaway version on this coat is small and works in harmony with the modestly sized jabot frill. Much taller collars were to become popular.

◁ COAT CUFFS

True to later 18th-century fashions, the coat's cuffs, smaller than in previous eras, hug the wrist closely, in keeping with the garment's slim, fitted profile. Their lavish decoration includes sequins, glass flower shapes, and embroidered buttons.

◁ TAIL TRIMMINGS

Focusing embellishment around the central division of the coat tails, and in a broad band close to the waist, attracts attention to the neat, elegant cut of the tails and the subtly waisted form of the coat.

◁ FALL FRONT

The dark (once black) velvet knee breeches feature the characteristic 18th-century "fall" front. The fall is a panel that closes up towards the waistband with buttons. The buttons here are covered with the same fabric as the breeches, making them more discreet.

◁ KNEE BANDS, BUCKLES, AND BUTTONS

A colourful band of floral-themed embroidery sewn over the velvet and tightened with a buckle provides a stylish trim for the bottom of the breeches. The side opening is closed with embroidered buttons and shaped to ensure a snug fit at the knees.
