

▲ SMITH AND WESSON M1917

Date 1917

Origin US

Barrel 5½in (14.4cm)

Caliber .45in ACP

During World War I, Smith and Wesson was commissioned to produce a revolver that chambered the .45in ACP round. This was the M1917. Although it was a success, it faced extraction problems unless the ammunition was loaded in flat half-moon clips, each carrying three rounds.

► SMITH AND WESSON MODEL 27

Date 1938

Origin US

Barrel 8¾in (21.3cm)

Caliber .357in Magnum

Smith and Wesson produced a huge variety of pistols chambered for the various Magnum cartridges—.357in and .44in are only the most common—on light, intermediate, and heavy frames. The heavy Model 27, which fired a .357in Magnum, was the most popular model, and was produced with 4in (10.2cm), 6in (15.2cm), and 8¾in (21.3cm) barrels.

▲ SMITH AND WESSON MILITARY AND POLICE

Date 1900

Origin US

Barrel 5in (12.7cm)

Caliber .38in Special

Having championed the hinged-frame revolver, Smith and Wesson, with the advent of more powerful ammunition, was obliged to switch to a solid frame with a swing-out cylinder for its Military and Police pistol. This was chambered for the long .38in Special round.

▲ ENFIELD NO. 2 MARK 1

Date 1938

Origin UK

Barrel 5in (12.7cm)

Caliber .38in

After World War I, the British Army decided to adopt a lighter caliber for its service side-arm. The revolver it chose was almost a copy of the Webley and Scott MK VI (left). The version shown was issued to tank crews, and lacks a hammer spur to prevent it catching from on clothing in the confined spaces of a tank.
