

◀ SA80

Date 1985–1994

Origin UK

Barrel 20½in (51.8cm)

Caliber 5.56 × 45mm NATO

Developed at the Royal Small Arms Factory, Enfield, UK, until 1988 and then British Aerospace (BAE) until 1994, the SA80 represented the culmination of a design program that had begun in the late 1940s. Aside from its use of plastic, the SA80 is also notable for its incorporation of sheet metal parts.

► FN2000 BULLPUP RIFLE

Date 2001

Origin Belgium

Barrel 16in (40.6cm)

Caliber 5.56 × 45mm NATO

The FN2000 is undoubtedly one of the most futuristic-looking weapons to have been developed. Of modular construction, it consists of a barrel/receiver unit attached to a frame by a single pin. The rifle is fitted with an optical sight and has a chromed barrel to resist wear and corrosion.
