

▼ STEYR SPP

Date 1993
Origin Austria
Barrel 5in (13cm)
Caliber 9mm Parabellum

A cut-down version of Steyr's TMP submachine-gun, the SPP—or Special Purpose Pistol—fires on semiautomatic only, and can take either a 15- or 30-round box magazine housed in the pistol grip.

▲ GLOCK 19 GEN 4 9MM

Date 2000s
Origin Austria
Barrel 4in (10.2cm)
Caliber 9mm Parabellum

The fourth generation series of Glock pistols is identifiable by the thumb rest on the upper part of the grip, the finger grooves on the forward edge of the grip strap, and the pattern of roughening cast into the grip plates themselves. The most distinctive feature, however, is the accessory rail forward of the trigger guard for installing a laser sight.

Finger grooves on grip

Base of 15-round box magazine

Accessory rail can be used to attach laser sights or a flashlight

▲ BERETTA 9000S

Date 2001
Origin Italy
Barrel 3¼in (8cm)
Caliber .40in Smith and Wesson/9mm Parabellum

The Beretta 9000S is a 9mm or .40in Smith and Wesson semiautomatic handgun with a polymer frame and a 10-shot magazine. It is both single- and double-action (its hammer must be cocked either manually or by pulling the trigger), and it has good safety features, such as an automatic firing pin block alongside a manual safety switch.

Butt houses 10-round box magazine
