

▼ BENELLI M1

Date 1980s

Origin Italy

Barrel 20in (51cm)

Caliber 12-gauge
(.73in/18.5mm)

Benelli produces some of the world's finest semiautomatic shotguns, such as the early version of the M1 seen here. This self-loading shotgun utilizes recoil energy stored in a short, powerful spring to provide power for the reloading cycle.

▲ REMINGTON 1100 SEMIAUTOMATIC SHOTGUN

Date 1985

Origin US

Barrel 28in (71cm)

Caliber 12-gauge
(.73in/18.5mm)

John Browning produced the first design for a gas-operated, self-loading shotgun while working for Winchester between 1902–04, but it was not put into production. This Remington 1100 is a modern example of a gas-operated shotgun, and was produced in a variety of barrel lengths and calibers.

▲ REMINGTON MODEL 870

Date 1985

Origin US

Barrel 25½in (64.7cm)

Caliber 13-gauge
(.748in/19mm)

One of the most popular slide-action shotguns in the US, the Remington Model 870 is made in a number of types designed for upland bird or waterfowl hunting. Differences between them involve various barrel lengths and types of choke (constrictions in the barrel near the muzzle for creating shot patterns). Over the years, the Model 870 has earned a well-deserved reputation for reliability in all weather conditions.

▲ DAEWOO USAS-12

Date 1992

Origin US/South Korea

Barrel 18in (46cm)

Caliber 12-gauge
(.73in/18.5mm)

Designed in the US and manufactured in South Korea by Daewoo, the gas-driven USAS-12 is unusual in at least two respects. First, it is a selective-fire weapon, with the option for single-shot or automatic operation (using a drum magazine for continuous fire); second, it can be set up for either right- or left-handed users.
