◀ M777 HOWITZER

Date 2005

Origin UK

Length 10.7m (35ft)

Caliber 155mm

Range 25 miles (40km) with M982 round

Developed by BAE Systems, the M777 Howitzer is a British gun that is used mainly by the US marine corps. It is the world's lightest 155mm howitzer and uses titanium parts. It is almost solely controlled by computers, which makes the gun extremely accurate due to its sophisticated aiming and positioning system.
