

▲ **MILITARY FORK WITH WHEEL-LOCK PISTOL**

Date c.1590
Origin Germany
Length 24¼in (61.6cm)
Caliber .35in (.89cm)

This long-shafted fork also has a war hammer and incorporates a wheel-lock pistol. Equipped with a gunmaker's "standard" pistol lock and barrel, this weapon appears to have been produced for practical rather than ceremonial purposes.

▲ **COMBINATION AX**

Date c.1610
Origin Germany
Length 22in (56cm)
Caliber .31in (.78cm)

The hollow axhead contains five short barrels. These are hidden by a hinged cover that forms the blade. If the piece was intended to function as a weapon, the pointed fluke would probably have been more effective in an offensive role.
