

► BRONZE 13-IN SEA SERVICE MORTAR

Date 1726

Origin UK

Length 5¼ft (1.6m)

Caliber 13in (330mm)

Mortars could be fired over the walls of fortifications to cause large-scale destruction, or into enemy troop formations to injure many soldiers at once. Sea service mortars were used to bombard fortifications on shore.

► MODEL BRITISH MORTAR

Date 1760

Origin England

Length (model) 2½ft (0.7m)

Caliber 13in (330mm)

This detailed model of a mortar was used in military training academies to instruct artillerymen on the correct use of such guns. It shows how the barrel on such pieces would be placed at a high angle (usually 45 degrees). The cast iron shell could be loaded by using a small derrick (a lifting device) to hoist it and place it into the muzzle.

▲ BRONZE CANNON (FALCON) AND CARRIAGE

Date 1773

Origin Rome

Length Not known

Caliber Not known

This exceptionally fine field gun and ornate carriage was made for Francisco Ximenez de Texado, Grand Master of the Order of St. John of Jerusalem. The barrel was modeled by Filippo Lattarelli, of Rome, on a mold by the earlier master gun-founder Orazio Antonio Alberghetti.
