

▲ HI NAWA JYU

Date Early 18th century

Origin Japan

Barrel 40½in (103cm)

Caliber .52in (13.3mm)

Japanese *hi nawa jyu* (matchlocks) could fire three bullets a minute and pierce typical samurai armour at 165ft (50m). This matchlock was made by Kunitomo Tobei Shigeyasu of Omi, western Japan. The influence of the Sakai school (below) is evident in its red oak stock although it has limited decoration.

▲ HI NAWA JYU

Date c.1700

Origin Japan

Barrel 39¼in (100cm)

Caliber .44in (11.4mm)

This early 18th-century matchlock musket is the work of the Enami family of Sakai, widely held to be among the finest Japanese gunmakers of the preindustrial era. The stock is made of red oak, and its decoration may have been added at a later date.

▲ INDIAN CARNATIC TORADAR

Date 18th century

Origin India

Barrel 44½in (113cm)

Caliber .629in (16mm)

The barrel of this simple, straight-stalked matchlock musket, or toradar, is exquisitely decorated with incised flowers and foliage, and entirely gilded. Made in Mysore, southern India, the musket's incised side plates are made of iron, and on its trigger it has a tiger in *kofigari*—a method of inlaying gold into steel or iron.

▲ TIBETAN MEDA

Date c.1780

Origin Tibet

Barrel 43¾in (111cm)

Caliber .66in (17mm)

Tibet was largely isolated from the rest of the world, but carried out trade with India and China. This *meda* (matchlock) shows Chinese influence in form and decoration. Attached to the forestock is an unusual rest, while the ramrod is a modern replacement.
